Christmas Seedsticks® Greeting Cards

Share festive wishes that grow into lasting memories

This Christmas, go beyond the ordinary with our Christmas Seedsticks® Greeting Cards – a unique and eco-friendly way to celebrate the season while planting the seeds of new beginnings. Each A6 greeting card comes with a set of Seedsticks® embedded with real Norway Spruce seeds – the same variety used to grow traditional Christmas trees. Your festive message won't just be read, it will be planted, nurtured, and remembered long after the decorations have come down.

Festive designs to choose from

To make spreading joy effortless, we've created four pre-printed full-colour festive designs, each carrying a warm Christmas message inside. Whether you're sending to clients, colleagues, or loved ones, these cards are ready-made to brighten the season. Every card is supplied with a plain white envelope, making it simple to send a thoughtful gift that's light on the planet but big on meaning.

The gift that keeps on giving

By planting the enclosed Seedsticks®, recipients can grow their very own Christmas tree. It's a living reminder of your thoughtfulness – something that grows year after year, creating a sustainable symbol of the season.

Branding made simple

Make your greeting card truly yours by adding your logo or message to the front cover (35mm x 35mm). It's the perfect way to keep your brand rooted in your recipients' minds, while also sharing an eco-conscious message of care and celebration. Celebrate Christmas in a way that lasts. Plant joy, grow memories, and send the gift of nature this festive season.
